Education

Sreenidhi Institute of science and technology **July 2019 – August 2023**
Bachelor of Technology in ECE *Hyderabad*

Experience

Cognizant **September 2023 – Present**
DevOps Engineer *Hyderabad*

- Engineered AWS cloud infrastructure using Terraform (IaC), provisioning 50+ resources (EC2, S3, IAM, RDS, VPC) with S3 backend and DynamoDB locking, reducing manual provisioning effort by 60%.
- Designed and implemented CI/CD pipelines using GitHub Actions, Concourse CI, and Jenkins to automate infrastructure and application deployments, reducing release time from 2–3 hours to under 30 minutes.
- Built containerized deployments using Docker and Kubernetes with Helm, standardizing release workflows and minimizing configuration drift across development and production environments.
- Automated configuration and secrets management using Ansible and HashiCorp Vault, while enabling observability with CloudWatch, Prometheus, and Grafana, reducing MTTR from 45 to 30 minutes.

Cognizant **March 2023 – September 2024**
Data Engineer(Cloud and Devops) *Hyderabad*

- Developed ETL and data ingestion pipelines using AWS Glue, Lambda, Athena, and PySpark, integrating Kafka connectors and SQL-based data views to improve data availability by 30%.
- Built distributed data transformation workflows using PySpark DataFrames and SQL-driven extraction, optimizing job configuration and partitioning to reduce ETL runtime by 20%.
- Implemented monitoring and alerting for production pipelines using CloudWatch and Dynatrace, enabling proactive failure detection and improving incident response time by 25%.
- Integrated secure data pipeline deployments with Terraform-provisioned AWS infrastructure and HashiCorp Vault secrets management, reducing configuration issues by 15%.

Projects

Cloud Infrastructure & ETL Automation Platform | *AWS, Terraform, CI/CD, SQL*

- Designed and implemented an AWS-based Cloud Infrastructure & ETL Automation platform using Terraform and CI/CD pipelines (GitHub Actions, Concourse CI) to automate infrastructure provisioning, streamline build and deployment workflows, and improve production stability through monitoring, incident resolution, and infrastructure optimization.

Cloud-Native DevOps Platform | *Docker, Kubernetes, GitHub Actions, OCI,* | **GitHub Repo**

- Built an end-to-end cloud-native DevOps platform enabling containerized deployments with Docker and Kubernetes, automated CI/CD using GitHub Actions, infrastructure provisioning via Terraform, secure configuration management, and observability with Prometheus and Grafana to ensure scalable and reliable application delivery.

Technical Skills

Cloud/Devops Technologies: Docker, Kubernetes, AWS (Lambda, EC2, S3, EKS, Glue, CloudWatch), Azure DevOps, Helm, Prometheus, Grafana, ELK Stack
Infrastructure & Automation: Terraform, CloudFormation, Ansible, HashiCorp Vault.
CI/CD & Version Control: Git, Github, Github Actions, Concourse CI, Jenkins.
Programming & Databases: Python, Bash Scripting, Linux, PostgreSQL, DynamoDB,
Soft Skills: Adaptability, Problem Solving, Teamwork, Communication.

Certifications

- AWS Certified Cloud Practitioner
- AWS Academy Graduate - Cloud Architecting
- Microsoft Certified: Azure Fundamentals
- OCI Generative AI Certified Professional
- Cyara Certified Expert (Platform Essentials)
- Github Copilot
